ABOUT

A highly motivated and detail-oriented Computer Science graduate with strong analytical skills and a passion for software development. Proficient in Python and Javascript, with experience in data science and building web applications. Looking for an opportunity to apply technical and problem-solving skills in a dynamic work environment.

SKILLS

- **Languages:** Python, Go, SQL , Javascript , C
- **Libraries & Frameworks:** Django, Flask, React, REST APIs, PySpark, TensorFlow, PyTorch, scikit-learn, Pandas, NumPy, Matplotlib, Seaborn
- **Tools:** Git, Github, Aws, Apache Kafka, Dbt
- **Databases:** PostgreSQL, Mysql, Snowflake

PROJECTS

TRADENET

Platform made in django that helps in choosing stocks to invest with tools for Fundamental and Technical Analysis and provides AI insights

- **AI-Driven Analysis:** Engineered and deployed AI solutions that synthesized real-time market data and historical financial statements to give insights, enhancing decision accuracy for technical and fundamental analysis.
- **Integrated Financial Platform:** Developed a comprehensive investment analysis platform providing users with integrated tools for in-depth fundamental valuation, technical indicator visualization, and actionable stock screening.
- **Performance and Optimization:** Reduced loading time by 75% through batch processing and page caching. This helped in almost instantaneous loading of pages.

REAL-TIME CLICKSTREAM ELT PIPELINE FOR E-COMMERCE ANALYTICS

- **Streaming Architecture & Ingestion:** Designed and implemented a scalable, fault-tolerant ELT pipeline to ingest and process 10,000+ events/second of user clickstream data. Utilized Apache Kafka for message queuing and Python/PySpark to manage data flow from source to staging in a Data Lake (e.g., AWS S3).
- **Data Modeling & Governance (Snowflake/dbt):** Established a robust ELT (Extract, Load, Transform) process where raw data was loaded into Snowflake, then utilized dbt to define, manage, and deploy complex analytical data models.
- **Performance and Business Impact:** Reduced end-to-end data processing latency by 60% through cluster tuning and optimized SQL queries within Snowflake. This enabled near-real-time business intelligence reporting on key metrics like conversion rates and cart abandonment.

CERTIFICATES

- Intermediate SQL by Datacamp
- Career Essentials in Software Development by Microsoft and LinkedIn
- Introduction to Machine Learning by NPTEL

EDUCATION

UTTRAKHAND TECHNICAL UNIVERSITY

Bachelor of Engineering, Major in Computer Science

Relevant Coursework: DSA, OOPS, DBMS, Computer Networks, Operating Systems, Computer Architecture

Dehradun, Uttarakhand

2022-2026

ST. MARY'S SR. SEC. SCHOOL, JWALAPUR

Higher Secondary Class XII

Haridwar, Uttarakhand

2021-2022

HOBBIES & INTERESTS

- Playing guitar and other instruments.
- Solving puzzles, coding challenges and participating in online competitions.
- Exploring new programming frameworks and open-source contributions.
